RE: Exchange 2007 upgrade and virtual server installation

Dear Chris,

I'm pleased to report we are very happy with the project that your team undertook to upgrade our Exchange server and deploy a new virtual platform for us.

The Maclean engineers worked closely with us to resolve any issues as they arose and in general the project went smoothly and we are very happy with the outcome.

Exchange 2007 has proven to be robust since we migrated across and combined with the virtual server platform has provided us with the flexibility and reliability to keep the business running

So many thanks to your team for their work on this project.

I am pleased to have worked with the Maclean team on this and I would be happy to recommend them to other clients looking to undergo similar projects.

Regards,
